Errata

The series of NASA Reference Publications numbered RP 1297 through 1300 has been printed without the final page of tabular information in each volume. The series consists of the following titles:

| Document | Title | Volume | Pg. missing |
|----------|--------------------------------------------------------------------|------------|-------------|
| RP 1297 | <i>Bonner Durchmusterung</i> | Volume I | p. 457 |
| | | Volume II | p. 447 |
| RP 1298 | <i>Borner Durchmusterung</i> (<i>Southern Durchmusterung</i>) | Volume III | p. 375 |
| RP 1299 | <i>Cordoba Durchmusterung</i> | Volume I | p. 446 |
| | | Volume II | p. 415 |
| | | Volume III | p. 424 |
| | | Volume IV | p. 423 |
| RP 1300 | <i>Cape Photographic Durchmusterung</i> | Volume I | p. 424 |
| | | Volume II | p. 440 |
| | | Volume III | p. 401 |

Please insert these pages in all copies of the series. We regret any inconvenience this has caused.

Cordoba Durchmusterung Volume I

1 Introduction

The "Cordoba Durchmusterung" (CD, Thome 1892-1932) is a visual survey of southern stars in the declination zones -22 to -89 deg, carried out as an extension to the "Bonner Durchmusterung" (BD) catalogs of Argelander (1859-1862) (see also Kuestner 1903) and Schoenfeld (1886). The survey was performed using techniques similar to those used for the BD, i.e., the stars were cataloged by allowing the telescope to drift along the mean declination of each zone and recording the positions and magnitudes of stars crossing the transit line of the field. The goal of the survey was to obtain a position and estimated visual magnitude for every star down to 10.0 magnitude inclusive, but the faint limit was confirmed from comparisons with other catalogs, to be somewhat below 10. The positional uncertainties quoted in the original publications are $\pm 0.42''$ and $\pm 0.23'$ for zones -22° to -32° . A list of all corrections made to the original data as a result of published corrigenda is presented in Section 3. No other corrections or changes have been incorporated into the original data, e.g., from more modern positions and magnitudes or comparison with the "Cape Photographic Durchmusterung" (Gill and Kapteyn 1895-1900). For a more detailed description of how the observations were made and for additional statistics of star counts and distribution within each zone, the source reference should be consulted.

2 Source Reference

Thome, J. M. 1892-1932, Cordoba Durchmusterung, Resultados del Observatorio Nacional Argentino 16 (1892, Part I: -22 to -32 deg), 17 (1894, Part II: -32 to -42 deg), 18 (1900, Part III: -42 to -52 deg), 21 (Part I) (1914, Part IV, -52 to -62 deg), 21 (Part II) (1932, Part V: -62 to

Data are present for all stars in the catalog except a few which have been deleted in the corrigenda; these have been flagged by a "D" following the number of each respective record, but the records and data have been left in the machine version in order not to change the star counts and numerical sequencing.

3 The Catalog

As in the original version, the positions are for the equinox 1875. Each page is headed by two entries giving the DM number and right ascension for the first and last entries on the page, respectively.

4 Changes Made to the Catalog

5 Acknowledgments

This immense project was successfully completed through the efforts of many people, without whose help the finished catalog would not now or possibly ever have reached fruition. Although the work was initiated and supervised by Jaylee M. Mead, Theresa A. Nagy and Wayne H. Warren, Jr., the punching could never have been begun and the project completed without the support and encouragement of the NSSDC Director James I. Vette. The keypunching was done at NSSDC by Beth Alexander, Carol Bergstrom and Margy Goodwin, while the monitoring software for the data transfer was written by Frank Barnes with contributions by Eugene Scarzafava, and data migration to tape was done by Charleen Perry with assistance and supervision by Ralph Post. Proofreading of individual zones was contributed by Scott Birney (Wellesley College), Richard Dietz (University of Northern Colorado), Mati Morel (Rankin Park, NSW, Australia), Theresa Nagy (ADC), Sidney Parsons (Space Telescope Science Institute), William Stein (U. S. Naval Surface Weapons Laboratory, Dahlgren, VA), George Wolf (Southwest Missouri State University), and Wayne Warren, Jr. Additional zones not returned by other volunteers were proofread at the ADC by summer students Paula Feldman and Kimberly Kniffen, who also assisted greatly with error checking, recording, and data correction. Checking and recording were also done at the ADC by Rajendra Nigam, Charleen Perry and Wayne Warren. The hard copy version was prepared by Nancy G. Roman. The material in this introduction is taken from the document prepared for the machine readable copy by Wayne H. Warren, Jr.
